# Instalando o Network Policy and Access Services (NPAS)

## **Breve Descrição:**

Serviços de Política e Acesso de Rede (NPAS) é um componente do Windows Server. Ele substitui o Serviço de Autenticação da Internet (IAS) do Windows Server 2003. O NPAS ajuda a proteger a integridade e a segurança de uma rede. A função de servidor NPAS inclui NPS (Network Policy Server), Health Registration Authority (HRA) e Host Credential Authorization Protocol (HCAP). No Windows Server, o NPS é a implementação da Microsoft de um servidor RADIUS (Remote Authentication Dial-In User Service).

### Passo 1

#### Abrir o Gerenciador de Servidor » Gerenciar » Adicionar Funções e Recursos

### Passo 2

Selecionar tipo de instalação » Instalação baseada em função ou recurso

#### Passo 3

Selecionar o servidor de destino » Selecionar um servidor no pool de servidor

📥 Add Roles and Features Wiz	zard			-		×
